

WASTE MANAGEMENT & RECYCLING - EXECUTIVE SUMMARY

Executive Summary

The Department of Waste Management and Recycling (DWMR) Five-Year Capital Improvement Plan (CIP) is dominated by capital projects at the Kiefer Landfill (KLF) including new liner construction, partial final cover construction, additional landfill gas collection system components, additional remediation of contaminated groundwater, wetland mitigation, bufferland planning, and site improvements. Most of the KLF projects are required for ongoing landfill operations and are prescribed by various state regulations and permit conditions. The CIP also includes minor improvements to the North Area Recovery Station (NARS), to the South Container and Transfer Site (SCATS), replacement of fully-depreciated equipment for solid waste and recycling operations, and a very small amount of new equipment for improved operation efficiencies resulting in net cost savings. All DWMR capital projects are funded through the Solid Waste Enterprise Fund without any contributions from the County General Fund. Projects proposed to be completed in the 2005-06 Fiscal Year Capital Budget include an “Operating Budget Impact” statement.

Following is a representative sample of the projects in the CIP.

- **Kiefer Landfill - Entrance Improvement Project** – This project includes regrading the entrance to the landfill, drainage improvements, fencing, and landscaping improvements. **Estimated Total Cost: \$370,233.**
- **Kiefer Landfill - Gas Collection System Expansion** – This project involves the design and construction of ongoing expansion of the landfill gas management system at the Kiefer Landfill into Module 2 and beyond. Project components include landfill gas extraction wells and collection pipeline. Landfill gas management is required under various permits and state regulations. As new areas of the landfill are filled, new extraction wells must be added and older wells and pipelines must be modified. **Estimated Total Cost: \$2,711,852.**
- **Kiefer Landfill – Landfill 1, Phase 2 Partial Closure** – This project includes the planning, design and construction of 25 acres of partial final closure at the Kiefer Landfill. Project components include final cover, drainage improvements, and landfill gas system modifications for Unit 1 and Unit 2 of the unlined portion of Kiefer Landfill known as Landfill 1. This project is required by various permits and state regulations. **Estimated Total Cost: \$3,951,000.**
- **Kiefer Landfill - Module 2 (M2) Phase 2 Liner and Ancillary Features** – This project includes construction of 13.5 acres of additional base liner, leachate collection systems, and ancillary features such as access roads and drainage improvements for the ongoing development of the Kiefer Landfill. The project is required to provide adequate disposal capacity for the next few years and the design is in compliance with various permit conditions and state regulations. **Estimated Total Cost: \$8,998,543.**

- **Kiefer Landfill - Wetland Mitigation** – This project provides for wetland mitigation as required in the Kiefer Landfill Expansion permits and Environmental Impact Report (EIR). The design, construction, and ongoing management of wetlands will provide mitigation for approximately six acres of vernal pools that are impacted by the ongoing development of the Kiefer Landfill. **Estimated Total Cost: \$2,350,000.**
- **NARS - Concrete Pad Repairs** – This project provides for various repairs and upgrades to the asphalt and concrete pavements at NARS. **Estimated Total Cost: \$150,000.**
- **SCATS – Tipping Pad Asphalt Overlay** – This project is for construction of an asphalt concrete overlay to the existing pad area at SCATS. **Estimated Total Cost: \$151,500.**

Elk Grove Landfill - Aerobic Bioreactor Development

Bond Road, Elk Grove, CA

Department: Waste Management & Recycling

Estimated Project Cost: \$ 325,250

Expected Completion Date: 2006

Funding Sources: Refuse Capital Outlay Fund

Project Description:

The Department has obtained the rights to implement a novel technology at Elk Grove Landfill to accelerate the decomposition of waste and greatly reduce the slow, steady release of landfill gas and the potential threat of leachate.

This budget request will fund an investigation via:

- a) well construction
- b) monitoring
- c) modeling
- d) regulatory review

Operating Budget Impact:

Operating costs will initially increase with this project expenditure; however, the project will ultimately lead to reduced costs compared to present, though the exact amount of the reduced costs cannot be determined until the project is completed.

Equipment Replacements

Kiefer Landfill, 12701 Kiefer Boulevard, Sloughouse, CA 95683
 South Container & Transfer Site, 8550 Fruitridge Road, Sacramento, CA 95826
 North Area Recovery Station, 4450 Roseville Road, North Highlands, CA 95660
 South Collections, 9611 Conservation Road, Sacramento, CA 95827

Department: Waste Management & Recycling **Estimated Equipment Cost:** \$21,595,470
Expected Completion Date: 2010 **Funding Sources:** Refuse Capital Outlay Fund

Project Description:
 Replacement of older, fully depreciated heavy equipment for various Collection, Landfill, Transfer, Engineering and Hazmat programs.

Operating Budget Impact:
 No additional operating impact costs associated with the acquisition of the equipment replacements.

Equipment Replacements

Kiefer Landfill - All-Wheel Drive Fuel Truck

12701 Kiefer Boulevard, Sloughhouse, CA 95863

Department: Waste Management & Recycling

Estimated Project Cost: \$150,000

Expected Delivery Date: 2006

Funding Sources: Refuse Capital Outlay Fund

Project Description:

2,000 gallon all-wheel drive fuel truck with air compressor and grease tank. This unit replaces an older, fully depreciated fuel truck 393-001.

Operating Budget Impact:

No additional operating impact costs associated with the acquisition of the replacement equipment.

Kiefer Landfill - All-Wheel Drive Fuel Truck

Project Costs	Prior Years	Fiscal Year 2005-06	Fiscal Year 2006-07	Fiscal Year 2007-08	Fiscal Year 2008-09	Fiscal Year 2009-10	Total

Kiefer Landfill - Bufferland Development

12701 Kiefer Boulevard, Sloughouse, CA 95683

Department: Waste Management & Recycling

Estimated Project Cost: \$ 120,000

Expected Completion Date: 2006

Funding Sources: Refuse Capital Outlay Fund

Project Description:

Conduct a thorough assessment of over 1,000 acres of countyowned land for development potential within the limitations imposed by the continuing objective to avoid encroachment of neighbors sensitive to the Landfill. Expects this assessment is the first step towards yielding a substantial amount of habitat conservation credits for County of private development projects.

Operating Budget Impact:

Operating costs will increase with this project expenditure; however, the project will ultimately lead to revenue and the expected net result is positive, though the exact amount of the net benefit cannot be determined until the project is completed.

Kiefer Landfill - Entrance Improvement Project

12701 Kiefer Boulevard, Sloughhouse, CA 95683

Department: Waste Management & Recycling **Estimated Project Cost:** \$370,233
Expected Completion Date: 2006 **Funding Sources:** Refuse Capital Outlay Fund

Project Description:
 Make improvements to the entrance area at Kiefer Landfill. The entrance would be regraded to accommodate traffic from the landfill gas utilization projects. Drainage facilities and fencing would be improved, existing gates would be replaced, and landscaping updated.

Operating Budget Impact:
 The completion of this project has no measurable impact on the operating budget.

Kiefer Landfill - Entrance Improvement Project

Kiefer Landfill - Excavator

12701 Kiefer Boulevard, Sloughouse, CA 95863

Department: Waste Management & Recycling

Estimated Project Cost: \$300,000

Expected Delivery Date: 2006

Funding Sources: Refuse Capital Outlay Fund

Project Description:

60,000 pound track mounted hydraulic excavator equipment. This replaces an older, fully depreciated unit 891-505.

Operating Budget Impact:

No additional operating impact costs associated with the acquisition of the replacement equipment.

Kiefer Landfill - Excavator

Kiefer Landfill - Flare Improvement and Landfill Gas Delivery Project

12701 Kiefer Boulevard, Sloughhouse, CA 95683

Department: Waste Management & Recycling **Estimated Project Cost:** \$580,800
Expected Completion Date: 2007 **Funding Sources:** Refuse Capital Outlay Fund

Project Description:

Improve the landfill gas collection system's delivery and flare capacities. Includes the installation of:

- Automation upgrades to the existing flare in Fiscal Year 2005-06
- Installation of a lower flow, low British Thermal Unit (BTU) flare in Fiscal Year 2006-07
- Installation of a gas sales delivery manifold in Fiscal Year 2006-07

Operating Budget Impact:

The installation of an additional low BTU flare system will result in increased maintenance costs. The increase may be covered under our current Gas Rights Agreement.

Kiefer Landfill - Flare Improvement and Landfill Gas Delivery Project

Kiefer Landfill - Gas Beneficial Use Projects

12701 Kiefer Boulevard, Sloughhouse, CA 95683

Department: Waste Management & Recycling **Estimated Project Cost:** \$446,479
Expected Completion Date: 2006 **Funding Sources:** Refuse Capital Outlay Fund

Project Description:

Construction of a facility to recover energy from collected landfill gas. The facility will consist of one or two projects that would utilize Kiefer Landfill gas. The majority of the project costs would be borne by the project developer. Department will pay for site grading and improvements.

Operating Budget Impact:

The completion of this project has no measurable impact on the operating budget.

Kiefer Landfill - Gas Beneficial Use Projects

Kiefer Landfill - Gas Collection System Expansion

12701 Kiefer Boulevard, Sloughouse, CA 95683

Department: Waste Management & Recycling

Estimated Project Cost: \$ 2,711,852

Expected Completion Date: 2010

Funding Sources: Refuse Capital Outlay Fund

Project Description:

Expansion of the landfill's gas collection system into Modules M2 and beyond. The project is anticipated to be developed in phases. Major efforts include:

- Installation of replacement wells (10-year life) on an annual basis.
- New wells will be installed in M2 in Fiscal Years 2006-07 and 2008-09.
- Header piping will be relocated in Fiscal Years 2005-06 and 2007-08.
- Installation of a permanent connection (48 inch pipe) from delivery manifold to perimeter collection system.
- Permanent perimeter header costs are included in the liner construction projects.

Operating Budget Impact:

The expansion of the landfill gas collection system will result in increased maintenance costs. The amount of increase is difficult to estimate but is proportional to the overall system maintenance costs.

Kiefer Landfill - Gas Collection System Expansion

Kiefer Landfill – Landfill-1, Phase 2 Partial Closure

12701 Kiefer Boulevard, Sloughouse, CA, 95683

Department: Waste Management & Recycling **Estimated Project Cost:** \$3,951,000
Expected Completion Date: 2007 **Funding Sources:** Refuse Capital Outlay Fund

Project Description:

This project includes the planning, design, construction, construction management, inspections, reporting, and oversight associated with construction of partial final closure components such as final cover, drainage improvements, and landfill gas modifications on 25 acres of Kiefer Landfill Units 1 and 2. The estimates are based on information contained in the 2003 Partial Final Closure Plan. Costs are adapted from the M2, Phase 2 Liner Engineer’s estimate. The estimates are based on a composite geosynthetic clay liner (GCL)/geomembrane final cover over all areas to receive final cover, consistent with current site permit documents. Costs will be lower if a clay cover is constructed over a portion of the area and much lower if a monolithic final cover is approved by the Regional Water Quality Control Board.

Operating Budget Impact:

The completion of this project has no measurable impact on the operating budget.

Kiefer Landfill - Landfill-1, Phase 3 Partial Closure

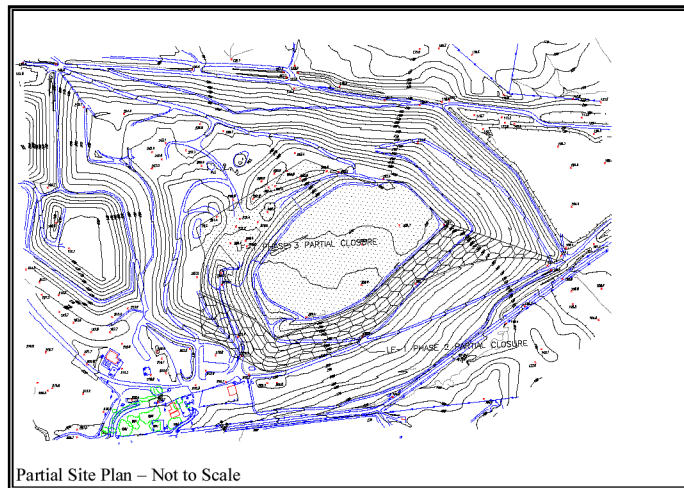

12701 Kiefer Boulevard, Sloughouse, CA, 95683

Department: Waste Management & Recycling

Estimated Project Cost: \$2,807,500

Expected Completion Date: 2010

Funding Sources: Refuse Capital Outlay Fund

Project Description:

This project includes the planning, design, construction, construction management, inspections, reporting, and oversight associated with construction of partial final closure components such as final cover, drainage improvements, and landfill gas modifications on 46 acres of Kiefer Landfill Unit 1. The estimates are based on information contained in the 2003 Partial Final Closure Plan. Costs are adapted from the Module 2, Phase 2 Liner engineer's estimate. The estimates are based on a composite geosynthetic clay liner (GCL)/geomembrane final cover over all areas to receive final cover, consistent with current site permit documents. Costs will be lower if a clay cover is constructed over a portion of the area and much lower if a monolithic final cover is approved by the Regional Water Quality Control Board.

Kiefer Landfill - Module 2 (M2) Phase 2 Liner and Ancillary Features

12701 Kiefer Boulevard, Sloughhouse, CA 95683

Department: Waste Management & Recycling **Estimated Project Cost:** \$8,998,543
Expected Completion Date: 2005 **Funding Sources:** Refuse Capital Outlay Fund

Project Description:

This project includes the planning, design, construction, construction management, inspections, reporting, and oversight associated with construction of approximately 13.5 acres of landfill liner, leachate collection systems, and ancillary features such as temporary and permanent access roads, green waste processing facility, perimeter landfill gas header pipes and sumps, drainage improvements, and fencing for Module 2, Phase 2 at Kiefer Landfill. The budget for Fiscal Year 2005-06 provides a contingency for possible change orders to the current construction contract.

Operating Budget Impact:

The completion of this project has no measurable impact on the operating budget.

Kiefer Landfill - Module 3 (M3), Phase 1 Liner and Ancillary Features

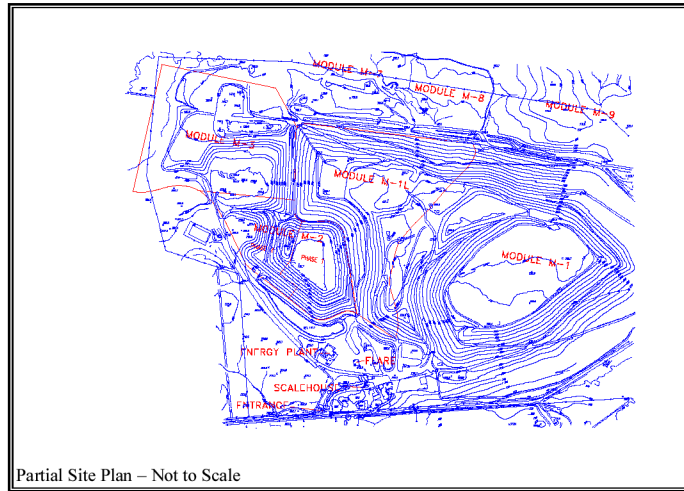

12701 Kiefer Boulevard, Sloughouse, CA 95683

Department: Waste Management & Recycling

Estimated Project Cost: \$5,988,000

Expected Completion Date: 2007

Funding Sources: Refuse Capital Outlay Fund

Project Description:

This project includes the planning, design, construction, construction management, inspections, reporting, and oversight associated with construction of approximately 20 acres of landfill liner and leachate collection systems for Module 3, Phase 1 at Kiefer Landfill. The budget is based on experience with Module 2 and conceptual design and cost estimating documents. The estimates will be refined with detailed design preparation that is anticipated to occur during 2006. The estimates do not include costs for permitting activities, groundwater monitoring wells, or costs for any aspects of the required mitigation for species and habitat.

Kiefer Landfill - Outbound Scale Replacement

12701 Kiefer Boulevard, Sloughouse, CA 95683

Department: Waste Management & Recycling

Estimated Project Cost: \$75,000

Expected Delivery Date: 2005

Funding Sources: Refuse Capital Outlay Fund

Project Description:

A truck scale for outbound traffic at the Kiefer Landfill. This is to replace an old "pit" design with a new shallow surface design. The new design is much easier to maintain.

Operating Budget Impact:

There will be no operating budget impact in the early years after the installation of the new truck scale; all repairs and maintenance should be under warranty.

Kiefer Landfill - Outbound Scale Replacement

Kiefer Landfill - Radial Stacker

12701 Kiefer Boulevard, Sloughouse, CA 95863

Department: Waste Management & Recycling

Estimated Project Cost: \$60,000

Expected Delivery Date: 2006

Funding Sources: Refuse Capital Outlay Fund

Project Description:

Radial Stacker is utilized to move material along a conveyor belt from the trommel screen to either the horizontal grinder or to a stacking area for temporary storage.

Operating Budget Impact:

The operating cost impact for this equipment is unknown at this time.

Kiefer Landfill - Radial Stacker

Kiefer Landfill - Secondary Groundwater Remediation System Improvement

12701 Kiefer Boulevard, Sloughhouse, CA 95683

Department: Waste Management & Recycling

Estimated Project Cost: \$ 249,000

Expected Completion Date: 2006

Funding Sources: Refuse Capital Outlay Fund

Project Description:

The existing Kiefer LF groundwater contamination results in two costly ongoing programs:

- 1) the pump and treat system
- 2) the extensive monitoring composed of sampling and monitoring

Our consultant Brown and Caldwell has identified two methods (Method 1: Focused water extraction from the more contaminated wells to reduce total flow; Method 2: Use of indicator parameters to reduce range of monitoring even while increasing frequency of monitoring.) by which we may reduce the costs of these two programs. An estimate of the costs and resulting net savings from these two methods will be forthcoming.

Operating Budget Impact:

Operating costs will initially increase with this project expenditure; however, the project will ultimately lead to reduced costs compared to present, though the exact amount of the reduced costs cannot be determined until the project is completed.

Kiefer Landfill - Secondary Groundwater Remediation System Improvement

Project Costs	Prior Years	Fiscal Year 2005-06	Fiscal Year 2006-07	Fiscal Year 2007-08	Fiscal Year 2008-09	Fiscal Year 2009-10	Total

Kiefer Landfill - Towable Air Compressor

12701 Kiefer Boulevard, Sloughhouse, CA 95863

Department: Waste Management & Recycling

Estimated Project Cost: \$15,000

Expected Delivery Date: 2006

Funding Sources: Refuse Capital Outlay Fund

Project Description:

Towable air compressor, under 50 Horsepower. This replaces older, fully-depreciated unit 364-666.

Operating Budget Impact:

No additional operating impact costs associated with the acquisition of the replacement equipment.

Kiefer Landfill - Towable Air Compressor

12701 Kiefer Boulevard, Sloughouse, CA 95683

Department: Waste Management & Recycling **Estimated Project Cost:** \$ 2,350,000
Expected Completion Date: Ongoing **Funding Sources:** Refuse Capital Outlay Fund

Project Description:

The project is anticipated to be developed in phases. Major efforts include:

- \$500,000 Estimated Endowment deposit in summer 2005
- \$40,000 First Year preserve management expenses for Grantee
- \$40,000 Interim security deposit equal to one year of management
- \$60,000 One-year construction monitoring
- \$50,000 Contingency for mitigation of construction damage
- \$100,000 Rough estimate for fencing and signing

NARS/North Collections - Can Yard Grading and Sealing

4450 Roseville Road, North Highlands, CA 95660

Department: Waste Management & Recycling

Estimated Project Cost: \$339,675

Expected Delivery Date: 2005

Funding Sources: Refuse Capital Outlay Fund

Project Description:

Grading and chip sealing of a 109,000 square foot area to house containers returned from the City of Citrus Heights and for north area can delivery. Grading to sheet drain to the west of the compound. Also included in project is perimeter chainlink fencing, two gates (one on the Northeast end and one on the Southeast end), and a small shed for hardware and forklift storage, and for employees to work in during inclement weather.

Operating Budget Impact:

The completion of this project has no measurable impact on the operating budget.

NARS - Forklift

4450 Roseville Road, North Highlands, CA 95660

Department: Waste Management & Recycling

Estimated Project Cost: \$30,000

Expected Delivery Date: November 1, 2005

Funding Sources: Refuse Capital Outlay Fund

Project Description:

Forklift replacement for older, fully-depreciated unit 383-302.

Operating Budget Impact:

No additional operating impact costs associated with the acquisition of the replacement equipment.

NARS - Forklift

NARS - Loader With Roll-Out Bucket

4450 Roseville Road, North Highlands, CA 95660

Department: Waste Management & Recycling

Estimated Project Cost: \$200,000

Expected Delivery Date: 2005

Funding Sources: Refuse Capital Outlay Fund

Project Description:

Loader with roll-out bucket, medium size 225-250 horsepower with foam filled tires. This replaces one older, fully-depreciated loader, 887-603.

Operating Budget Impact:

No additional operating impact costs associated with the acquisition of the replacement equipment.

NARS - Transfer Concrete Pad Repairs

4450 Roseville Road, North Highlands, CA 95660

Department: Waste Management & Recycling

Estimated Project Cost: \$150,000

Expected Delivery Date: 2005

Funding Sources: Refuse Capital Outlay Fund

Project Description:

Replacement of overlay pad with concrete at the North Area Recovery Station tipping area.

Operating Budget Impact:

Operating costs will initially increase with this project expenditure; however, the project is a necessary consequence of the loss of contract with the City of Citrus Heights.

Solid Waste Authority (SWA) Green Waste Site Acquisition

County of Sacramento
South Area

Department: Waste Management & Recycling

Estimated Project Cost: \$750,000

Expected Completion Date: 2006

Funding Sources: Refuse Capital Outlay Fund

Project Description:

The project is to develop a garden refuse composting facility of roughly 100,000 tons per year capacity, which includes 50.0 percent of the garden refuse collected by the Department of Waste Management and Recycling (DWMR). The facility is expected to be operated by a private-sector partner under contract to the Regional Solid Waste Authority. All potential sites currently under consideration are located in the unincorporated area of the County. Thus, it is envisioned that the County would own the site and lease it to the SWA.

Operating Budget Impact:

The completion of this project is expected to have minimal impact on the operating budget since the costs are lower than expected for managing the remaining 50.0 percent of the garden refuse collected by DWMR.

Solid Waste Authority (SWA) Green Waste Site Acquisition

SCATS - Tipping Pad Asphalt Overlay

8850 Fruitridge Road, Sacramento, CA 95826

Department: Waste Management & Recycling

Estimated Project Cost: \$151,500

Expected Completion Date: 2006

Funding Sources: Refuse Capital Outlay Fund

Project Description:

Construction of an overlay of asphalt material over the existing SCATS pad area. Project would require removal of damaged asphalt and replace with new and seal.

Operating Budget Impact:

The completion of this project has no measurable impact on the operating budget.
