(2) The portion of the cost of a fixed asset, other than a wasting asset, charged as an expense during a particular period. In accounting for depreciation, the cost of a fixed asset, less any salvage value, is prorated over the estimated service life of such an asset, and each period is

(2) A fund established because the governing body has decided that periodic determination of revenues earned, expenses incurred and/or net income is appropriate for capital maintenance, public policy, management control, accountability or other purposes.

GOVERNMENTAL FUND TYPES - Funds used to account for the acquisition, use and balances of expendable financial resources and the related current liabilities – except those accounted for in proprietary funds and fiduciary funds. In essence, these funds are accounting segregation of financial resources. The measurement focus in these fund types is on the determination of financial position and changes in financial position (sources, uses and balances of financial resources), rather than on net income determination. The statement of revenues, expenditures and changes in fund balance is the primary governmental fund type operating statement. Under current GAAP, there are four governmental fund types: general, special revenue, debt service and capital projects.

GRANT - A contribution from one governmental unit to another, usually made for a specific purpose and time period. Example: "Nutrition Programs for the Elderly" are financed by the Federal Government and administered by the County.

These levels of budgetary control are (a) appropriated budget, (b) legally authorized nonappropriated budget review and approval process, which is outside the appropriated budget process or (c) nonbudgeted financial activities, which are not

MISSION STATEMENT - A succinct description of the scope and purpose of a county department.

MODIFIED ACCRUAL - The County's basis of accounting for governmental and expendable trust funds. The accrual basis of accounting adapted to the government fund-type measurement focus. Under it, revenues and other financial resource increments (e.g., bond issue proceeds) are recognized when they become susceptible to accrual, that is when they become both 'measurable' and 'available to finance expenditures of the current period.' 'Available' means collectible in the current period or soon enough thereafter to be used to pay liabilities of the current period. Generally, expenditures are recognized when the fund liability is incurred. All governmental funds, expendable trust funds and agency funds are accounted for using the modified accrual basis of accounting.

vote requirement to increase state taxes; and (4) a two-thirds vote of the electorate for local agencies to impose 'special taxes'.

PROPRIETARY FUND TYPES - Sometimes referred to as income determination or commercial type funds, the classification used to account for a government's ongoing organizations and activities that are similar to those often found in the private sector (i.e., enterprise and internal service funds). All assets, liabilities, equities, revenues, expenses and transfers relating to the government's business and quasi-business activities are accounted for through proprietary funds. The GAAP used are generally those applicable to similar businesses in the private sector and the measurement focus is on determination of net income, financial position and changes in financial position. However, where the GASB has issued pronouncements applicable to those entities and activities, they should be guided by these pronouncements.
